

Good Practice Guidance for Care Homes
Refrigerator Temperature Monitoring Chart

Check each working day. **Temperatures must be between +2°C and +8°C.**
 If the temperatures are outside the recommended range, document known reason.
 Take appropriate action as indicated in the care homes medicine policy and record the action taken.

Month: _____ Year: _____

Date	Current temp (°C)	Min temp (°C)	Max temp (°C)	Checked by	Min / Max Reset (tick)	Reason / Any action required if necessary
