

## Good Practice Guidance for Care Homes

### Refrigerator Temperature Monitoring Chart

Month/Year: \_\_\_\_\_

Check each working day. Temperatures must be between +2°C and +8°C.

If the temperatures are outside the recommended range, document known reason. Take appropriate action as indicated in the written procedure and document the action taken.

Date	Current temp (°C)	Min Temp (°C)	Max temp (°C)	Checked by	Thermometer Reset (tick)	Reason / Any action required if necessary
