

**Vitamin D Deficiency/Insufficiency Management Algorithm**  
 Based on Cumbria CCG Guidelines 2013, PH 56 and product SPCs

There is no single correct approach to diagnosis, interpretation of results or treatment—this summary is designed to give a one option only approach if preferred by clinicians  
**Consider the possibility of nut allergy if prescribing any oil based product—these products should be nut free. InVita D3 (25,000IU) is a licensed oral liquid supplied in plastic ampoules, Licensed 800IU preparations are Fultium-D3 capsule and Disunin tablets.**
