Consider prescribing a macrogol instead of lactulose Show 5 Suggestions Overrule with Reason Overrule

• NICE (Cochrane Quality and Productivity topics) recommends a macrogol in preference to lactulose for the treatment of chronic constipation. A Cochrane review concluded that treatment with macrogols is superior to lactulose in outcomes of stool frequency per week, form of stool, relief of abdominal pain, and the need for additional products in chronic constipation. This is a QIPP Key Therapeutic Topic.
