

County Durham & Tees Valley Area Prescribing Committee

Summary of decisions made regarding new product requests considered at a meeting of the Committee on **Thursday 10th March 2022**

Classification of products:

- Green drug Can be initiated and prescribed in all care settings O- Second line / alternative green drug

 Amber Specialist initiation / recommendation drug. Can be recommended by a specialist for initiation in primary care; or be initiated by a specialist and transferred to primary care once the patient stabilised. In some cases there may be a further restriction for use outlined these will be defined in each case.
- **ASC** Amber Shared Care drug These are specialist drugs which must be initiated by the specialist, but with the potential to transfer to primary care within written and agreed shared care protocols and according to the agreed process for transfer of care
- Red drug Drugs that should remain under the total responsibility of the specialist. Usually considered as "hospital only" drugs
- Not Approved Drugs that have been considered by the APC or other approved body and are not approved for prescribing within County Durham & Tees Valley.
- Not Reviewed Drugs that haven't been reviewed by the APC yet. This usually means that no application has been received or that an application is in progress. These drugs are not normally considered appropriate for prescribing in County Durham & Tees Valley.
- Unclassed Drug Drugs that do not fall into one of the above categories

2) New Requests	-	1						
Tirbanibulin (Klisyri®) 10 mg/g ointment for	√			CCG Commissioned, tariff included drug. Indicated for the field treatment of non-				
actinic keratosis				hyperkeratotic, non-hypertrophic actinic keratosis (Olsen grade 1) of the face or scalp in adults. Requested as an addition to:				
				 Actikerall 5mg/g + 100g cutaneous solution Solaraze 3% gel (3% diclofenac sodium sodium hyaluronate 2.5%) Efudix (5% w/w furouracil) Aldara (Imiquimod 5% cream) 				
				The short and simple treatment course of tirbanibulin (5 days) may be considered an advantage compared to other options with longer treatment durations. The mild to moderate side effect profile of tirbanibulin and efficacy profile will lead clinicians to consider tirbanibulin as a treatment option instead of other potent treatments, which are often associated with a higher frequency and severity of local skin reactions.				
				Note: No clinical data on treatment for more than 1 treatment course of 5 consecutive days are available If recurrence occurs, or new lesions develop within the treatment area, other treatment options should be considered.				
				Decision: approved as a GREEN drug as an additional option. To be used as per Primary Care Dermatology Society Guidelines for actinic keratosis when these are updated to include Tirbanibulin.

6) Products considered by NTAG						
None						
7) Miscellaneous decisions by the APC						
Ursodeoxycholic acid 250mg capsules	©			CCG Commissioned, tariff included drug. Currently Ursodeoxycholic Acid capsules are not on the CDTV formulary, only tablets. Checked the drug tariff and although only the 250mg strength available in capsule form, they are cheaper than the tablets. Noted that product license between tablets and capsules may differ and this should be borne in mind when prescribing. Decision: to add Ursodeoxycholic Acid capsules in addition to the tablets as GREEN drugs		
Duoresp Spiromax 160/4.5 inhaler	©			CCG Commissioned, tariff included drug. Duoresp Spiromax has had a license change and now is licensed in asthma in patients over 12yrs in a fixed dose regime for the 160/4.5 and 320/9 doses. They also have an >12yrs MART license for the 160/4.5 dose. Respiratory CAG proposes that the 160/4.5 dose both in fixed and MART regime would be a valuable addition to the paediatric asthma guideline. Decision: to add to formulary and paediatric asthma guidelines as a GREEN drug.		

formulary entry for sucraffate (only oral solution currently listed on CD&T formulary) Decision: Do not add to formulary as appears only licensed product is oral solution.
